DETAILED ACTION

Examiner acknowledges receipt of petition, change or Power or Attorney, amendment, supplemental IDS, terminal disclaimer under 37 CFR 120(d) and request for reconsideration under 37 CFR all filed 11/14/03. Claims 8-11, 15-18, 21-23, 27-32 and 34-38 are pending.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicants' submission filed on 11/14/03 has been entered.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 8, 9, 15-18, 21-23, 27-32 and 34-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Daher et al. (US 4,376,118).

Daher discloses a non-aqueous solution that comprises a mixture of tetracycline antibiotic salt, non-aqueous diluent, non-aqueous solvent, non-aqueous non-ionic solubilizer, antioxidant and non-aqueous anionic solubilizer (abstract). Lauryl lactate is a diluent (column 1, line 58),

Art Unit: 1615

polysorbates, ethylene oxidepropylene oxide block copolymers are non-aqueous solubilizers (column 2, lines 6-12), and ethanol or methanol or N-methyl-pyrrolidone are solvents (column 1, lines 51-53). The method claims administer the generic composition as recited in generic claims and antibiotics are expected to be administered. The viscosity of a composition is necessarily a function of the components of the composition. Daher does not teach the recited ratio of the solvent, surfactant or polymer. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to prepare the non-aqueous solution of Daher. One having ordinary skill in the art would have been motivated to use the appropriate amounts of solvent, polymer and/or surfactant with expectation of producing a single-phase viscous vehicle.

4. Claims 10 and 11 are allowable because the prior art does not teach a stable non-aqueous single-phase composition that comprises polyvinylpyrrolidone, glycerol monolaurate and lauryl lactate.
